FSC CERTIFICATE

Gráficas Estella and Rodesa obtain the FSC certificate

Gráficas Estella and Rodesa are pleased to announce that, in keeping with our policy of sustainability and respect for the environment, we have modified our internal control systems so as to comply with the FSC (Forestry Stewardship Council) custody chain requirements. The standards were accepted by the SGS (www.sgs.com) on the last february, and we got the Certificate number: SGS-COC-003151.

The Chain custody certificate allows Gráficas Estella and Rodesa to use the logo FSC on their products.

The Trademark of the Forest Stewardship Council (FSC) indicates that the wood used to make the product comes from a forest which is well managed according to strict environmental, social and economic standards. The forest of origin has been independently inspected and evaluated according to the principles and criteria for forest management agreed and approved by the Forest Stewardship Council.

FSC is an international, non profit association whose membership comprises environmental and social groups and progressive forestry and wood retail companies working in partnership to improve forest management worldwide.

If you need further information, please visit the web site: www.fsc.org

How to use the FSC logo in your publications

The first condition to use the FSC logo on the publications is to use a certified FSC paper. The paper mills do not necessary have FSC approval for all their grades of paper but there is a large list of certified papers which is growing everyday. It's not essential, but recommended, that all of the constituent parts of the book (text, endpapers, cover etc ...) use a FSC paper, but it must be the major proportion.

Once the paper is FSC, the companies that will handle the paper (printing, binding and any additional process to combine the components) must be certified on the Chain custody certificate FSC, otherwise they can not provide the necessary FSC guarantee.

Both, Gráficas Estella and Rodesa, are in the position to guarantee the necessary conditions to include the FSC logo on their products, whether the paper is provided by our customers or by us. Please do not hesitate to contact us if you have any questions.

As well as the FSC Certificate, the Management Control Systems of Gráficas Estella and Rodesa have the Quality certifications ISO 9000 and Environmental ISO 14000.

SGS-COC-003151
